ABOUT

I am a student at the University of Arizona Coding bootcamp learning to become a full stack developer. This experience has shown me how to learn new skills quickly and effectively. It has also taught me how to work very well in a group dynamic as well as on my own. Doing this program has helped me realize how much I love to code and my desire to learn new things. I'm a very fast learner, motivated, and very accepting of constructive feedback. I'm never afraid to ask questions to better myself and my skills, and can always remain calm and positive under pressure.

WORK EXPERIENCE

TRINITY BOOTCAMP STUDENT

Bootcamp Student - March 2021-September 2021

- Learned a plethora of coding skills and technologies
